

# Food Preparation and Nutrition

# What has changed.....

- A wider curriculum including more cross-curricular skills
- A higher demand with harder topics introduced.
- All assessments take place in the final year of the GCSE
- 2 NEA tasks
  - NEA 1 is a food science investigation worth 15%
  - NEA 2 is a practical food investigation worth 35%
  - NEA 2 includes a 3 hour practical food exam
- one written exam worth 50% of final grade.

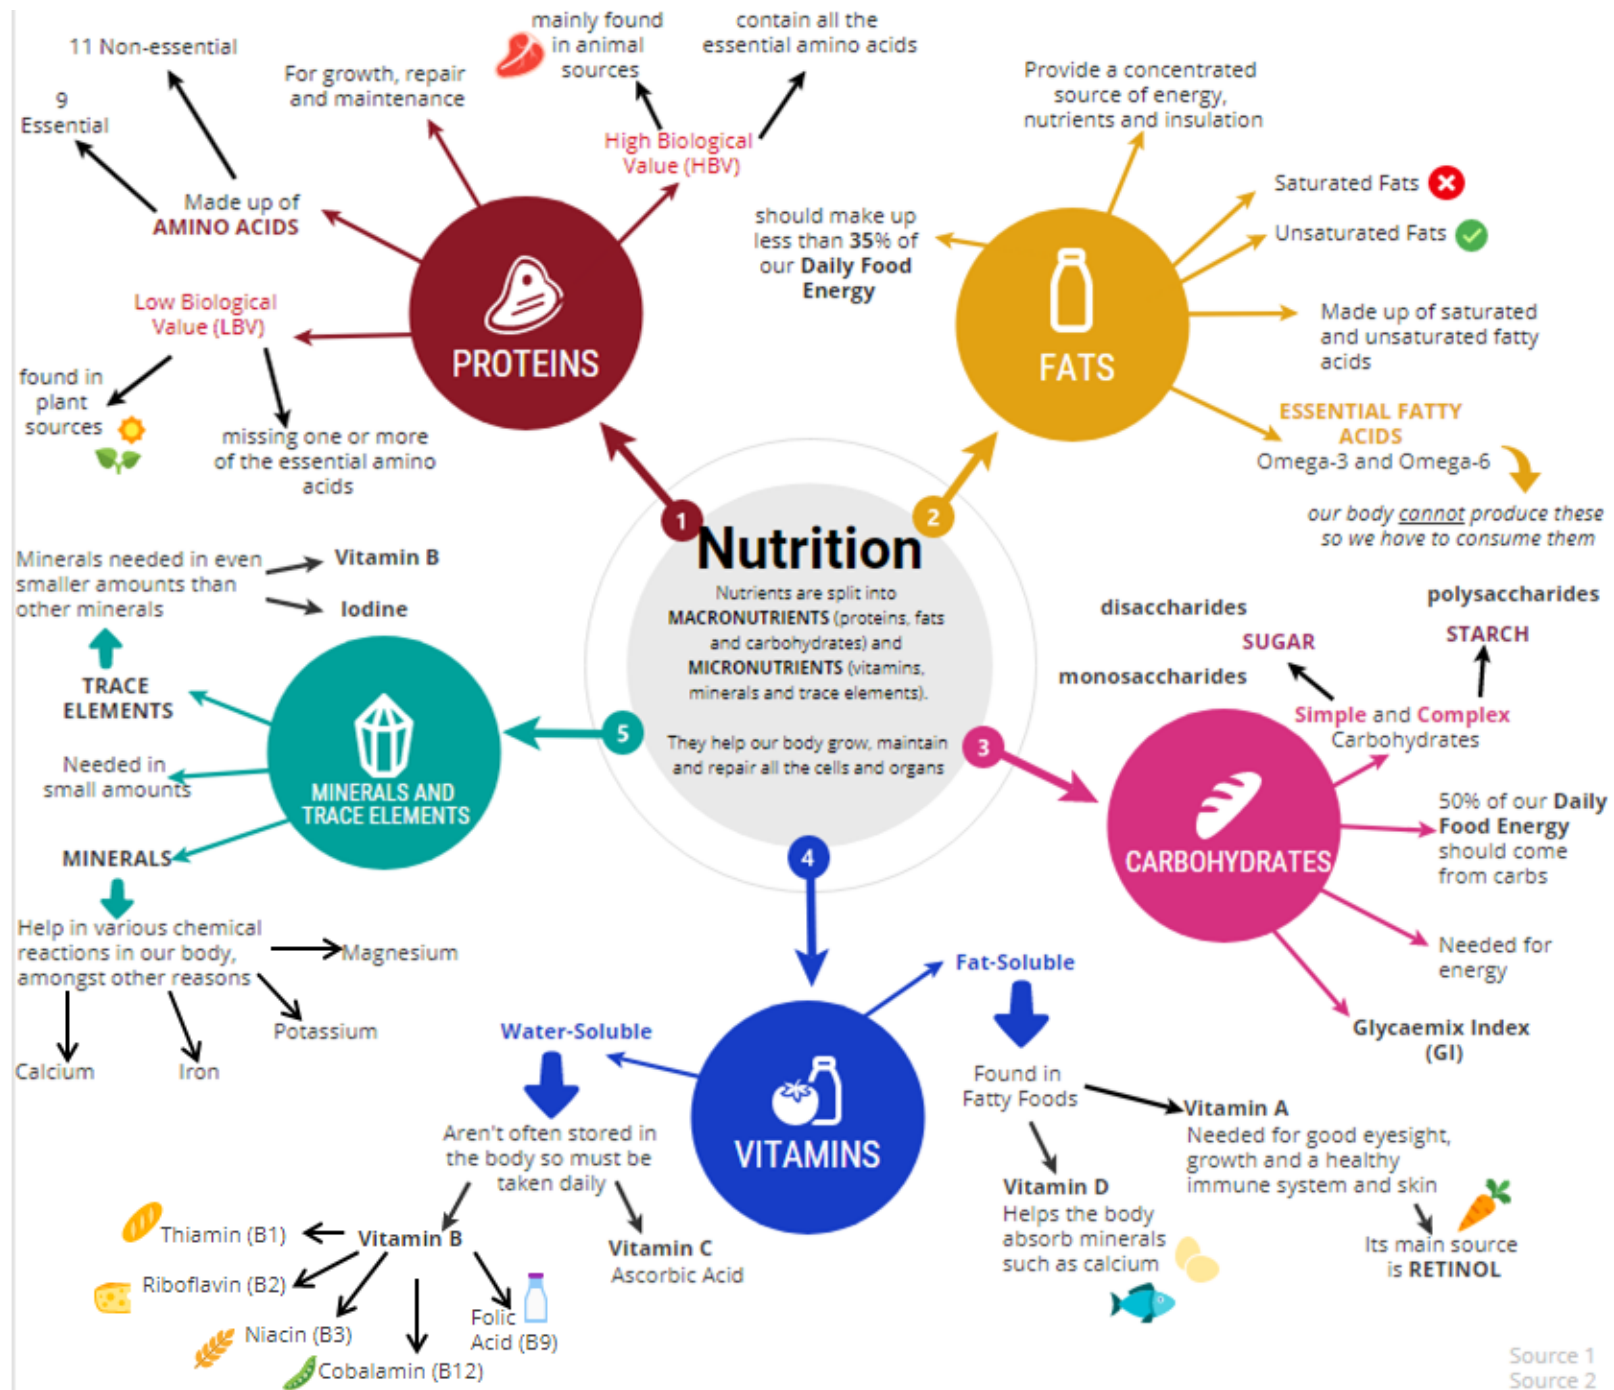

# Why Mind Mapping?

- It provokes a deep level of thought.
- It is visual.
- It helps you organise thoughts.
- It is a relatively speedy process.
- It helps develop the skills needed for answering long answer questions in the written exam.
- It provides suggestions for additional study areas/ideas.

# WAGOLL

**NOW**  
IT'S YOUR TURN!

# Collaborative Mindmapping

Work in pairs to fill in what you know or can remember on the sheet you have been given - you have access to textbooks and other resources so you can look up anything you can't remember or don't know. After 5 minutes move on to the next sheet. By the end of the lesson all groups will have contributed to each mind map and they can be photographed and used to revise from and prompt other revision activities.
