

AQA GCSE Design and Technology Revision

On **Firefly** under Resources – Subjects – Design Technology and Food – GCSE Design Technology are all the **theory lessons** we have covered in class which can be used to revise from.

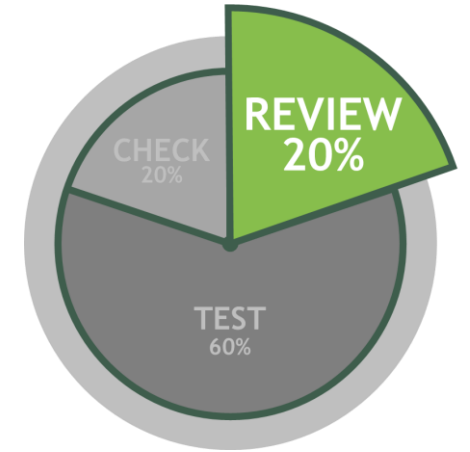

What has changed.....

- A wider curriculum including more cross-curricular skills (Maths and Science)
- All assessments take place in the final year of the GCSE
- 1 NEA task which they are currently completing worth 50% of their final grade
- One written exam worth 50% of final grade.

Why Mind Mapping?

- It provokes a deep level of thought.
- It is visual.
- It helps you organise thoughts.
- It is a relatively speedy process and is good for learning keywords
- It helps develop the skills needed for answering longer answer questions in the written exam.

AQA GCSE Design and Technology Revision

Now it is your turn!

Work in groups to fill in what you know or can remember on the sheet you have been given - you have access to textbooks so you can look up anything you can't remember or don't know. After 5 minutes move on to the next sheet. By the end of the task all groups will have contributed to each mind map and they can be photographed and used to revise from and prompt other revision activities.
